Visitor delegations 2022

ABU DHABI	ITALY
AUSTRALIA	KOREA
CZECH REPUBLIC	LUXEMBOURG
DENMARK	MALAYSIA
ECUADOR	SAUDI ARABIA
FRANCE	SINGAPORE
INDIA	SWEDEN
IRAN	TÜRKIYE

We developed custom-designed programs to fit the special interests of delegations with up to 100 members. The high quality of the delegations was reflected in their composition, ranging from specialists in the field of aviation fire protection to policy experts and mega-city fire department chiefs.

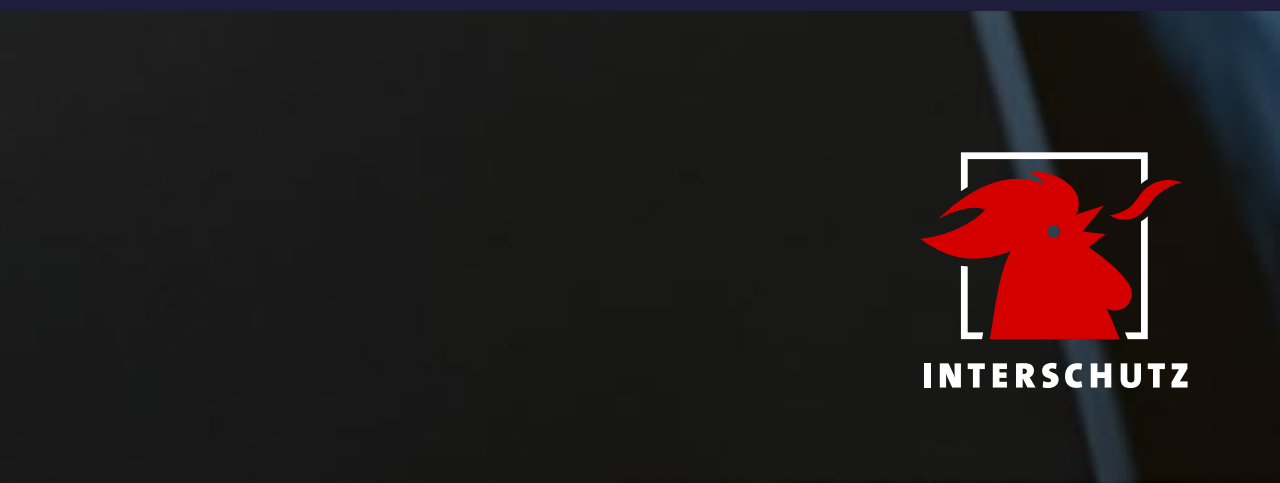

Focus topics 2026

***Impacts of
climate change***

***Turning point in
civil protection***

Sustainability

***Artificial intelligence in control
centers, situation centers and
at the scene of operations***

FOCUS TOPIC:

Impacts of climate change

Flooding, flood disasters, forest fires and storms: the consequences of climate change are having significant impacts in the spheres of fire and rescue services, disaster prevention and civil protection.

At INTERSCHUTZ, suppliers and players show how technological innovations and comprehensive collaboration can make preventive and reactive measures even more efficient.

FOCUS TOPIC:

Turning point in civil protection

Between everyday life and disaster: The requirements and challenges facing emergency management are constantly changing, and at an increasing pace. Dynamic and innovative solutions are in demand.

Showcase your concepts and technologies for integrated and collaborative crisis management at INTERSCHUTZ.

FOCUS TOPIC: ***Sustainability***

Sustainability is of crucial importance from both ecological and economic standpoints. From alternative drives to durable and adaptable equipment right through to securing available, well-trained personnel: all these aspects help make for sustainability in emergency management.

Use INTERSCHUTZ as a platform to showcase sustainable products and concepts.

FOCUS TOPIC:

Artificial intelligence in control centers, situation centers and at the scene of operations

From early detection to situation assessment right through to deployment coordination and communication: artificial intelligence is already playing a crucial role in emergency management– and this role will become increasingly pivotal in the future.

At INTERSCHUTZ, leading representatives from research and industry show how intelligent technologies and artificial intelligence can be used to make emergency deployments more efficient – and where the limits lie.

Good reasons for exhibiting at INTERSCHUTZ:

**Visitors with
investment in mind**

**Community hub
and forum**

Internationality

Network platform

INTERSCHUTZ is not only THE industry platform for commercial businesses. Numerous users present themselves at INTERSCHUTZ, too, and enable a direct, unique exchange of insights and ideas.

PROTECTIVE EQUIPMENT

CIVIL PROTECTION

COMMUNICATIONS & CONTROL CENTER SOLUTIONS

Fire Fighting

Fire brigades operate in ever-changing deployment scenarios. At INTERSCHUTZ, manufacturers present true innovations and the best solutions available for equipment, vehicles, fire extinguishing systems and emergency management in fire and disaster control.

Fire Prevention

The best method of firefighting is preventing fires before they can even begin. To this end, preventive fire protection requires constant adaptation – to modern construction methods, larger buildings and denser building development. Use INTERSCHUTZ to show how technologies and innovative concepts can be used to shape preventive fire protection.

Rescue Services

Between coping with major emergency situations, skills shortages and the integration of telemedicine, rescue services are finding themselves confronted with changing general conditions and tasks. Innovative vehicles, mobile medical technology and modern equipment play key roles in the solution to this. At INTERSCHUTZ, exhibitors present modern, sustainable products and concepts.

Protective Equipment

Fire services have a diverse operational spectrum. And the requirements on people and materials are equally diverse. In emergency situations, the equipment must provide optimal support and the utmost safety. New protective clothing must shield the firefighters not only from heat but also from carcinogenic particles. At INTERSCHUTZ you will find the entire spectrum of PPE for all deployment situations.

Civil Protection

Civil protection operations – necessitated by, for example, environmental disasters – pose both technical and logistical challenges. In the thematic area civil protection, national and international exhibitors present the solutions and products with which these challenges can be mastered in the face of the turning point in emergency management.

Communications & Control Center Solutions

Constantly changing emergency scenarios require innovative digital solutions as well as seamless cooperation between all actors. INTERSCHUTZ shows how current and future requirements on networked solutions in the field of communication systems and control center technology can also be managed with the integration of AI.
